EGGROCK SPECIFIED WATER RISER
NOT TO SCALE

INSTALLATION SEQUENCE

- ① Core drill floor according to Eggrock provided template
- ② Sanitary sewer and vent riser built in wall and stubbed out of rated or non-fire rated walls. Fire caulk stub-out openings as required.
- ③ Top floor units placed over cored holes and trap arms connected from floor below. Process is repeated connecting bathrooms from the top floor down.
- ④ Common hot and cold water supply connections are made
